Collection No. 88

Chinnick & Walker

N.W. N.S.W. & S.W. Qld.

11 – 20/3/59

32698 Nyngan 11.3.59.

32713 Camped 6.30pm.

12.3.59

32713 Depart 7.30am.

32724 Goolamboree

32739 Skirt of gravelly ridge bearing Euc intertexta, Mulga, Budda, with occas Wild orange & Callitris. Scalded ground with plant cover in patches and under trees. Dominant sp Aristida, Traegus, Dactyloten, Chloris truncata & Bassia sp mainly under trees.

Peakesia fusconaculata, Oedalus australis, Pycnoscheitus striatus, Macrotona scutiformis

32743 Coolibah

32767 Slight rise bearing Euc intertexta and odd Euc sp. with occas mulga. Understory of Dodonea, Cassia & Eremophila. Ground cover

Peakesia fusconaculata, Gonialea macronotum, Coryphistes sp., Oedalus australis, Pycnoscheitus striatus

sparse, consisting of Bassia, Dactyloteneum, Salsola & Eragrostis sp in water run-off channels and catchment areas.

32774 Byrock.

32793 Open savannah woodland Eucalyptus populnea, Acacia Auriculiformis, Bassia tricuspis, Salsola kali, Eragrostis sp as ground cover.

32794 Open savannah woodland Eucalyptus populnea, Acacia Auriculiformis, Bassia tricuspis, Salsola kali, Eragrostis sp as ground cover.

32795 Open savannah woodland Eucalyptus populnea, Acacia Auriculiformis, Bassia tricuspis, Salsola kali, Eragrostis sp as ground cover.

32822. Bourke arrived

13.3.59

32824 Bourke depart 3pm.

32838 Turned east from Dry Lake.

32854 Turned back on same route

* 32856 Mosaic pattern of compact with flood plain. Ch tern. 3-5/100

32863 Type 4a with Gedgea. Corythi sp. Dominant ground cover Triplex sp with Salsola - Bassia sp. Camped 6.30pm.

14.3.59

32863 Depart 8pm.

32865 = 32838.

32869 Sandy loam rise bearing

Corphiatus sp., Tupaya sp., Azilota
Thick stand of Melaleuka sp
ochracea, Apotropis vittata, Pycnosticta
with some Dodonea. Ground
seriatus, Azilota sp. 3, Qualletta angulata,
cover sparse mainly small tussocks
Buforaguta sp. (?)
of Eragrostis dielsii with
scattered annual herbs.

32881 Red sand country
Apotropis vittata, Unnisa
leaving Dodonea as dominant.
guttulosa, Pycnosticta seriatus, Azilota
Some Rochia sp. as shrub
ochracea, A. sp. 1, Tapesta sp., Resusplia
understorey. Mixed grasses &
sp. 8, Callitala sp. (?)
herbs mainly Trichinium, with
Eragrostis and Aristida as
sparse ground cover.

* + 32902 Sandy country leaving
Echiantus quadriflorus, Pedalea
Belah Dodonea sp and Acacia
australis, Pycnosticta seriatus, Apotropis
excelsa. Remains of annual
vittata, Chortoicetes terminifera
growth evident. Bassia birchii
present in patches.
Ch. Term 10/100.

32906 Exgonia

* 32914 Wamego flood plain
Zaborna sp. 1
F.S.H. Astrebla mainly dry.
Ch. Term 3/100.

* 32917 OBC. flood plain
with compact island
Ch. term 8/100. Adults
except for odd 5th instar.

* 32921 OBC. Gidgea ridge
Monistria pustulifera
(red country) with F.S.H.
on flood plain. Pastures
rapidly drying off
Winged Monistria sp taken
Ch. term 12/100.

* 32923 flood plain adjacent
to sandy ridge. Enneapogon
dominant on oviposition habitat
Food shelter habitat —
Astrebla drying off.

32930 Barrangum

32933 OBC. Oviposition habitat

supporting. Bassia-Kochia sp together with Chloris truncata. Food-shelter habitat with Eragrostis setifolia, Atriplex, Salsola and Bochaxia sp. Pastures drying off. Ch term 10.5/100.

* 32935 Gidgea timbered compact area adjacent to heavy self-mulchy plain. Food shelter habitat with Astrebla, Atriplex and Eragrostis setifolia. Green tinge with all cover but rapidly drying out Ch. term. 2.5/100

* 32941 Silty scald area bearing cover of Kochia x Bassia sp (annuals) (Chorthacanthus terminifera) Food-shelter habitat comprising Astrebla, Atriplex, Diplachne fusca (green) with Bassia sp.

Bh. term 2/100

32949 Similar ecology as for (32941)
Bh. term. 2/100.

32945 Silty scaldy area as oviposition habitat, with Kochia and Bassia sp as co dominants. Food shelter-habitat comprising entirely of short Flinders grass with some Astrebla tussocks.
Bh term. 2·5/100

32971 Edge of water course lined with Euc coolibah. Monitor trig pustulifera, Sclerophorus flavigulatus, Zabala sp.1
Oviposition habitat. comprising slope into depression bearing Atriplex, Dactyloten. and Bassia sp. Food-shelter habitat green with Eragrostis sp, Atriplex, Dactyloten. and Chloris divaricata
Bh term 12/100

32981 Sand ridge with Callitris (Ununia guttulosa, Acacia aulacocarpa, Atalaya) glauca Acacia excelsa, odd (Stropfyrna dulcosa, Monotrix pustulifera, Eucalyptus) Euc sp and Dodonea as shrub (Pycnosorus scratus) scattered throughout. Ground cover entirely annual, Salsola, Trichinium, Urnuia guttulosa very numerous, estimated at 75/100.

Adjacent to ridge a flood plain bearing Tussocks of Eragrostis mainly dead. Bassia and Atriplex present all green but drying off.

Ch. Term. 0/100

33004 Cunnamulla

33027 Yelbeth plains.

returned to Cunnamulla

speedo broke at 33030

Camped 6.30pm estimated (Adriepsis 2F.1) 4mi. W. of Cunnamulla

15-3-59

Departed camp site 8.30am.

Stop 1. Ca 12 W of Cunnamulla.

Treed area on scald plain bearing White wood, Gidgee, Eremophila sp. Ground cover mixed grasses-herbs. Enneapogon dominant with Eragrostis sp Bassia, Kochia s (annuals) with peg weed prominent in more sheltered areas. Odd bush of Enchylena sp at butt of some of the trees. Pasture dry. Ch. Term. 12/100.

Stop 2. Crest of low ridge in Acacia Tyspaya sp., Myoporum platycarpum, aneura stand. Many young mulga Corymbia sp., Acacia victoriae, present but spaced. Two species of Eremophila sp. 1. 2 sp. 2, Dodonaea viscosa, Cassia (compound sticky leaf sp. grey needle Casuarina sp. leaf sp.). Eremophila (Turkey bush) mainly dead. Ground cover sparse, Dactyloctenium Bassia sp. Kochia sp (annuals)

[2mi E. Shaft Sta Ck]

Stop 2 — 22 miles W of Evansville.
Bed of Ohio River
Small exposure of Upper Devonian
Formation of S. Minnesota pink shaly sandstone
& shale with brown concretionary
layers of limestone. Upper bedding
is dull crumbly with fossils. Much above
ground water must be visible
(Ground shows Kinderhook)
Other outcrops on lower slope.

Stop 3 — 4 miles W of Yale.
Hillside
Fine buff sandstone. Concretionary
layers along road. Broken but
Good with Dip. Strike and
Joints visible. Fossils
Abundant. Impressions of Lepidodendron
Sandstone
Lower 6 ft. of Coal Measures
2nd rock outcrop on Stop

Stop 5 Ca. 8 mi. E of Evansville
Pink sandstone with green

Envelopes Separate with some
Leaves up ground digging off.
